

# iPhone Automation Robot

## Overview

Valet is an innovative hardware solution designed to automate interactions with iPhone applications, leveraging the versatile and powerful Raspberry Pi platform. This device aims to simplify repetitive tasks, enhance productivity, and enable seamless integration of iPhone apps into automated workflows and systems. Valet is ideal for developers, testers, remote workers, and tech professionals seeking to automate tasks on their iPhones without direct manual intervention.

# valet: iPhone Automation Robot

## Features and Capabilities

- Open source client and server code
- HTTP+JSON API
- App Interactions: USB HID screen touches, swipes, and keystrokes to automate any app or system setting on iPhone
- Visual testing support with OpenCV
- Bring Your Own Magic (Compatible with other image detection AI or machine learning libraries)
- Screenshot and video feed API
- Install, launch, quit, or background any app from the App Store
- Notifications: Automate handling of incoming notifications
- Data Management: Automate data entry, extraction, and transfer between apps
- Communication: Automate sending of messages, emails, and social media interactions
- IoT Management: Create or modify any Bluetooth, WiFi, Mobile Data connection
- Backup and Sync: Automate backup processes and synchronize data across devices and cloud services

## Hardware Specifications

- Core Platform: Raspberry Pi 4 Model B
- Processor: Broadcom BCM2711, Quad-core Cortex-A72 (ARM v8) 64-bit SoC @ 1.8GHz
- Memory: 8GB LPDDR4-3200 SDRAM
- Storage: 64GB MicroSD Card (pre-loaded with Valet software and Raspberry Pi OS)
- Connectivity:
  - Gigabit Ethernet
  - Dual-band 802.11ac wireless LAN
  - Bluetooth 5.0, BLE
  - USB: 2 × USB 3.0 ports, 2 × USB 2.0 ports
- Video & Sound:
  - 2 × micro HDMI ports (up to 4kp60 supported)
  - 3.5mm analog audio-video jack
- Video Capture:
  - HDMI to CSI-2 Module with Toshiba TC358743XBG
  - Supported resolutions: 1920x1080, 1280x720
  - Format: MJPEG
- USB HID: Mouse, keyboard (with additional iOS Accessibility settings)
- Power: 5V DC via USB-C connector
- Dimensions: 240mm × 120mm × 87mm
- Weight: 606g (without accessories)

# valet: iPhone Automation Robot

## Software Specifications

- Operating System: Raspberry Pi OS (64-bit version, optimized for Valet)
- Automation Engine: Custom-developed open-source software using Python and OpenCV
- Supported iPhone Models: iPhone 7 and newer, running iOS 13 or later
- Features:
  - Web interface for manual phone control
  - Script creation with Python or any programming language with HTTP & JSON support.

## Network Access

- SSH: Enabled by default, password-based SSH authentication provides encrypted access over a network
- VNC: Supported. VNC provides remote desktop support to Raspberry Pi OS
- Remote manual or automated access over the Internet supported with Tailscale.

## Package Contents

- Valet Hardware (Raspberry Pi 4 Model B)
- 64GB MicroSD Card (with pre-installed software)
- Toolkit with hex drivers and SD card reader
- USB-C Power Supply 27W 100-240V AC 50/60Hz Input. (5.1V / 5A DC Output)

## Warranty and Support

- 1-year limited hardware warranty
- 2-business day turnaround email technical support

## Intended Use

Valet is designed for legal and ethical use cases only, including software development and testing, personal productivity enhancement, accessibility support, and integration of iPhone apps into professional workflows. Users are advised to ensure their use of Valet complies with the terms of service of all involved software and platforms.
